

Introducing **Honey-Comb** Packaging solution that protects your **Products, Profit, Planet!**

**New!**  
**Honey-Comb**  
Cushioning

The Honey-Comb Hex Cushioning is a revolutionary patented protective packaging system for the most fragile items. It is based on an ingeniously simple idea. We start with a roll of Kraft Paper that is die cut with thousands of slits that expands into hexagonal cells to form a 3-dimensional cushioning material. On the inside is a second layered soft tissue product protector that you unroll along with the Honey-Comb as you need at your station!

**Wrap, Tuck, Box-it! NoTape Required!**

The Honey-Comb Hex Cushioning Roll allows small volume users and those with multiple volume pack stations the opportunity to employ this New Packaging Cushioning. The Roll is meant for users such as Retail Shops, Assembly Lines, Moving Industries, Gift, Glass Ware & more!

**Pricing Discount on Volume!**
